SUMMARY

I'm a seasoned software developer with expertise in PHP, Laravel, and Shopify API. I build and maintain web applications, focus on user experience, and manage servers for optimal performance. I collaborate with teams to set coding standards and documentation. Currently freelancing, I fix bugs, develop new features, and work with PHP and JavaScript frameworks, databases, CSS frameworks, and cloud platforms. I also have knowledge in microcontroller programming with Arduino and languages like C++, Unity3d, and C#.

SKILLS

- PostgreSQL
- SQLite

PROFESSIONAL EXPERIENCE

Backend Developer

MindArc

09/2020 – 11/2022

Sydney, Australia

- Developed and maintained Shopify Apps that integrated Shopify stores with ERP systems, improving operational efficiency.
- Managed and optimized existing Shopify Apps and Magento websites for improved performance and user experience.
- Participated in brainstorming and planning sessions with the product manager to identify requirements and create actionable tickets.

PHP Developer

SendItOut International Outsourcing Inc.

04/2019 – 01/2020

Pasig City, Philippines

- Developed the API for the company's logistics partner, improving their communication and data exchange capabilities.
- Maintained the old website of the company, ensuring its reliability and optimal performance.
- Collaborated in the planning and co-development of a job posting application for the company, contributing to its successful launch.

Software Engineer II

Beestripe LLC

2018 – 2019

Pasig City, Philippines

- Developed internal tools to track revenue generated by browser extensions.
- Created SQL queries for Redash Application, enhancing data analysis capabilities.
- Designed and developed websites and browser extensions for the company, including:

- Browser Protection: A Chrome extension that checks if installed app extensions are safe and comply with guidelines.
- SwiftSweeper: A Chrome extension that instantly cleans the user's browser.
- Searchlock: A Chrome extension that provides a private search engine, without tracking user searches.
- Contributed to establishing PHP coding standards for the company.
- Collaborated on creating documentation for the applications developed by the company, improving user accessibility and understanding.

Software Engineer I

Beestripe LLC

2017 – 2018
Pasig City, Philippines

- Maintained and improved the functionality of the company's legacy browser extensions and websites, ensuring their smooth operation and reliability.
- Successfully migrated applications built on the outdated CodeIgniter framework to the latest version of Laravel, improving their performance and security.

PHP Developer

Simplex Internet

2016 – 2017
Pasig City, Philippines

- Designed and developed an internal tool to track the libraries and frameworks used by the company's developers, improving visibility into the technology stack and facilitating more efficient decision-making for future projects.

Backend Developer

One Network E-Commerce

2015 – 2016
Pasig City, Philippines

- Developed APIs for the company's E-Commerce and MLM platforms, enhancing their functionality and improving data exchange capabilities.
- Collaborated with senior developers in identifying and fixing bugs on the company's E-Commerce platform, ensuring its reliability and optimal performance.

FREELANCE EXPERIENCE

Software Engineer

Circlelink Health

11/2022 – 11/2023
New York, USA

- Collaborated on developing new features for the company's web app, contributing to its functionality and user experience.
- Diagnosed and fixed existing bugs in the company's web app, ensuring a smooth and reliable user experience.
- Provided innovative ideas and practical solutions to address the backlog of tickets, enhancing the overall productivity of the development team.
- Assisted other developers by offering helpful and actionable suggestions to improve their workflow and code quality.

Fullstack Developer

MedProjects

2021 – 2022
Pasig City

- Built pages and features for the company's web app as a task-based developer, contributing to the project's overall functionality and user experience.

Backend Developer

LingoChingoo

2021 – 2022
Quezon City, Philippines

- Managed the development of the LingoChingoo App, overseeing the project from start to finish.
- Planned and designed the backend architecture of the LingoChingoo App, ensuring its scalability, reliability, and optimal performance.
- Developed the backend of the LingoChingoo App, utilizing industry-standard technologies and best practices.
- Managed and set up the AWS server for the LingoChingoo App, ensuring its proper deployment and maintenance.

Fullstack Developer

Xiklab Digital

2019 – 2022
BGC, Taguig, Philippines

- Developed the frontend of a Philippine pharmaceutical company's website, ensuring its user-friendliness and responsiveness.
- Created various modules for the company's online social rewarding system, enhancing user engagement and loyalty.

Senior PHP Developer

StraightLogin

2019 – 2020
BGC, Taguig City

- Contributed to the development of an adult website, where I assisted in the creation of the API and helped to ensure that the site's functionality was running smoothly. This involved working closely with the development team to identify and troubleshoot any issues that arose. Additionally, I contributed to the design and implementation of new features to improve the user experience.

Backend Developer

Synapps Corp

2016 – 2019
Parañaque City,
Philippines

- Developed a mobile application for creating dynamic forms that could be customized and populated with data by the user. The app provided a flexible and efficient way of creating and submitting forms, enhancing the overall productivity of the company.
- Worked as a DevOps, responsible for managing the server setup and ensuring optimal performance of the company's applications. My duties included setting up and maintaining servers, monitoring system resources, and troubleshooting issues, ensuring that the applications were always available and performing at their best.

Web Developer

CuriousLab

2018 – 2018
San Juan City,
Philippines

- Designed and developed an API for a job posting application, enhancing the application's functionality and facilitating the recruitment process for the company.
- Contributed to the development of new features for Singapore Airlines, ensuring that the airline's website remains competitive and user-friendly for customers.

Software Developer

DibzTech

2017 – 2018
Pasig City, Philippines

- Created HR time tracking tools to improve efficiency and streamline the company's HR processes.
- Developed and maintained the API for the company's Parking App, ensuring its reliability and optimal performance.
- Designed and developed an E-Commerce Website, providing users with an intuitive and user-friendly online shopping experience.
